

RUBBISH BOXES ON STREET CORNERS

The past week Superintendent J. C. Nye of the city street department has had placed in the business district of the city a number of sanitary "rubbish" boxes. The boxes are neat and attractive, made of sheet iron and are 18 by 26 inches, painted in aluminum color.

On both sides of the street, at the intersections from Twenty-second to Twenty-sixth, on Twenty-fifth street from Washington to Wall avenues and on Twenty-fourth street from Washington to Lincoln, these boxes have been placed, marked "rubbish," and others will be placed in the business districts and at the parks and school houses.

Mr. Nye says he hopes the people will observe these boxes and deposit bits of waste paper or any substances they may be burdened with, rather than throwing the rubbish into the gutters and upon the sidewalks. The boxes are attached to the pavement by a heavy piece of iron extending from the top into the pavement.

On the inside of the box is an adjustable gunny sack, having a draw cord at the top. Each day the sack is removed and the rubbish taken to the dumps or the crematory. Ventilation of the box is perfect, the bottom being open. Water in rainy seasons cannot accumulate. The boxes are made at home and are said to be among the best in use. They were modeled after the rubbish cans of Denver.

Already the boxes are being freely used by the people and are found to be well filled each day. It is planned to have a box at each corner on both sides of the streets in the business districts.

As the pony contest nears the end, the interest shows remarkable increase. In fact there have been so many entries in the contest that publication has grown too long for publication in full. In this list are those who have two hundred or more votes. Those who have fewer than two hundred votes will continue in the contest just the same, their count will be made every day and their names added to the list published as soon as they have sufficient votes to justify it.

There are now but two weeks before the pony is awarded. The contestants who are making the most votes are those who are selling the merchandise certificates, which are supplied by the store. Any contestant whose name does not appear in this list may learn their standing by calling Wright's Store.

JOHNSON-LANGREN.
Wednesday, June 11, in the Salt Lake Temple, occurred the marriage of Miss Julia Johnson, a popular young lady of Ogden, to W. E. Langren of Moab, Utah.

The bride is the daughter of Mr. and Mrs. C. J. Johnson of 1954 Steele avenue.

After visiting with relatives and friends in Salt Lake and Ogden for six weeks they will make their home in Moab, Utah.

HUFF-ANDREWS.
Junius J. Andrews, instructor in agriculture at the Ogden high school, and Miss M. Elva Huff of Driggs, Idaho, will be married next Wednesday in the Salt Lake temple. They will be at home in Ogden after the 25th of the month.

DUNDEE AND WHITE.
Los Angeles, Cal., June 16.—Johnny Dundee, the Italian featherweight, and Jack White of Chicago, rounded out their preparatory work today for their twenty-round bout tomorrow

night. Dundee until yesterday was quoted as a 10 to 7 favorite but even money is predicted as ringside odds.

FRENCH BANTAM TRAINING.
Los Angeles, Cal., June 16.—Charles Le Doux, French bantamweight champion, who will meet Eddie Campi, the Pacific coast champion, on the night of June 24, in a twenty-round encounter, took up light training today. Le Doux arrived in Los Angeles last night.

PENNY SOCIAL.
A penny social was given by the M. I. A. of the Fifth ward Thursday evening in the ward amusement hall. A penny for each letter in a person's name was charged as admission fee and the gentlemen were charged a penny each for each time they danced.

The stage was divided into two sections, one being used as a beauty parlor and the other as a refreshment booth. The basement represented an art gallery. About 250 guests were entertained.

Mrs. George Davis of Salt Lake was the guest of Ogden friends for a few days during the past week. Mrs. Davis will accompany her sister, Miss Vivian Eccles to Chautauque, N. Y., where Miss Eccles will study vocal music during the summer.

Miss Marian Burnett of Dec, Ore. is a guest at the Eccles' home.

Mrs. Frank Pingree of Coalville was an Ogden visitor on Wednesday last.

MALAN-HOBBS.
Miss Teresa Malan, daughter of Mr. and Mrs. B. Malan, was married to C. James Hobbs, son of Mr. and Mrs. Fred Hobbs of London, in Salt Lake on Wednesday last.

A reception to 30 of the relatives and friends was given at the Malan home Wednesday evening and hearty congratulations together with handsomely wedding remembrances were offered.

Mr. and Mrs. Hobbs left for Helper Friday morning, where Mr. Hobbs is employed by the Rio Grande.

Mrs. Phoebe Dahlstrom and children have returned to their homes in La Grande, Ore., after a two weeks' visit with Ogden and Salt Lake relatives and friends.

CAMPFIRE GIRLS.
The Campfire Girls met Tuesday evening last at the home of their guardian, Mrs. Virginia Matthews, 449 26th street, at 7:30 p. m. There was a large attendance and a pleasant evening was enjoyed by all.

The lawn social of Wednesday afternoon and evening was postponed on account of damp weather. The next meeting will be Tuesday evening, June 17, at 7:30 p. m., at the guardian's home.

Dr. and Mrs. J. W. Greer have as their guests Mr. and Mrs. R. C. Greer of Missouri.

TROUT SUPPER.
A jolly party was entertained at the Hermitage one evening during the past week at a trout supper with David Hamilton as host. The guests were:

Miss Nell Byrnes, Evanston; Mrs. Scott Parmley and little daughters, Frances and Eloise; Mrs. Shirk and Misses Edna Hamilton and Ruby Cook; David Hamilton, Scott Parmley, Dr. Dinneen and John Brown.

LAWN SOCIAL.
The young ladies of the First Congregational church gave a delightful lawn social Friday evening at the home of Mrs. Walter Richey, 2414 Madison avenue.

Mr. and Mrs. N. G. Conley and children left yesterday for California Oregon and Washington, where they will spend the summer.

Mr. and Mrs. Sidney Stevens returned to Ogden yesterday after a month's absence in New England, where they were called by the death of Mrs. Stevens' father at Concord, N. H. Mr. and Mrs. Stevens visited in Boston and New Haven.

**MUCH WEALTH
IS SHOWN IN
COURT**

All space in that section of Judge Reeder's court reserved for prisoners was taken up this morning by a delegation of 10 alleged vagrants marched over from the county jail by Sheriff DeVine and Deputy Sheriff Hobson.

The ten had been arrested on Friday, the 13th, in the jungles below the Weber bridge and some surprising revelations were made in court when they told their stories this morning.

All but three pleaded guilty. One of the three turned out to be a regular traveling bank and exhibited so much wealth that those in the court were envious. He told the judge he could not see how he could be a "vag" with the papers he had on him and he took out a thick wallet and laid the contents on the judge's desk.

There were deeds to two lots in Salt Lake, a receipt for county taxes and some currency. When the sheriff saw "exhibit A" he asked that the man be released from custody, probably to prevent a tie-up of the money market. His partner produced some currency and he also was allowed to go.

The remaining eight told why they had congregated in that neighborhood and all but one said they had been loafing there because they heard hymns and loved music so they followed up the chorus. The other said that he had grown curious when he saw a party making for the woods and had followed only to learn that the men were officers. His curiosity led to his arrest for he resembled the others so well that he was taken along.

One fellow, who grinned through the whole proceedings called for this comment from the judge:

"I'd be ashamed if I were you to be arrested in such company and then take the matter lightly."

"Why?" asked the prisoner. "What's the use of taking things seriously? After I am arrested, might as well be cheerful about it."

"Well, I guess that's a good way to look at it," answered the judge as he gave each man 10 days.

Where women are few in number they are highly prized. Alaska will grant them the vote.—Providence Journal.

BEARS MUST BE NUMEROUS IN THE WASATCH

Q. R. Craft, district fiscal agent, in the local forest service office, returned Saturday night from the Mantle and Utah forests and the Utah experiment station. In speaking of the trip, he said:

Bears must be numerous in the lower Wasatch mountains from the fact that one man shot two, and another trapped ten, this spring in Twelve-Mile canyon, near Mayfield.

Utah Experiment Station.
The Utah forest experiment station, seven miles east of Ephraim, promises to be an interesting point to visit. It is located just under a thousand-foot ledge on the south, in a dense stand of aspen, with enough fir, spruce, balsam, and limber pine protruding their spiral tops above the crowns of the aspen. A bath is composed of laboratory 20 feet square will be enclosed by June 30, and a ranger's house is to be built later this summer.

Some of the experiments are to determine the best month in which to cut aspen mine props in order to insure abundant reproduction from sprouts. For this three half-acre plots have been cut clean in middle August, late September and early June, respectively. Another experiment is to learn the extent to which aspen, when thinned by cutting all trees mine-prop size, can be depended on to produce future crops of mine props, and the length of time required for the next and following crops. For this a plot has been thinned and record made of the present size of each remaining tree. The smaller trees have previously been shaded so that their growth has been slow. The question is, How rapidly will they recover when given sunlight? To determine this, subsequent measurements will be taken at regular intervals. Other experiments seek to find improved methods of planting.

There has been serious trouble from washing and gullying of the mountain slopes in the vicinity of the station, especially on the summit of the mountain. To reduce this damage, favoring the growth of aspen, the grazing of sheep has been excluded on a strip 50 miles long and 2 miles wide at the top of the east slope. To determine accurately as to the correct treatment, two "erosion areas" of ten acres each have been fenced side by side at the summit. At a point where practically all drainage from each will be carried by dams a "sediment tank" 6 by 12 feet and 2 feet deep is being placed. The two areas will then be treated similarly for 2 years to determine whether they are sufficiently similar to afford a fair comparison. After that, grazing will be continued on the one but not on the other, to find to what extent washing of the soil will be lessened by the encroachment of vegetation.

To determine the relation between altitude and length and continuity of growing weather, aerial and soil thermometers, rain gauges, and wind indicators have been placed at points with varying elevations between 8,000 and 10,000 feet.

For the present, hourly readings for 24 hours are taken weekly of the soil thermometers, and the aerial thermometers and wind indicator (weather bureau instruments) are self-recording and will ultimately be connected by wire, with the "triple register" at the station laboratory. The three soil thermometers record conditions at depths of six inches, a foot and a half, and two feet and a half, respectively. The instruments set up just between the "erosion plates" will show the amount and rapidity of rainfall. Gauges not self-registering, situated in each flat, will be regularly examined to learn if the precipitation was similar on each plot.

A New Industry.
Not only has the estimate of the aspen as a tree been heightened, but a new industry has been created by the discovery that aspen is a timber suitable for mine props in the coal mines of Carbon county. Props from 8 to 16 feet in length, not less than 5 nor greater than 10 inches in diameter, are sold at from 12 to 1 cent per linear foot, according to accessibility, and 1 cent per foot is paid by the purchasers for hauling to the railroad, about 7 to 9 miles. About 500 feet are transported in one load, so that the haulers make \$5 a day. If the roads are good. Over a hundred thousand feet a month of aspen mine props are secured from the Mantle forest.

Intensive Use of Forests.
In the region from Provo to Richfield occurs the most intensive use of the national forests of any part of the United States—that is they are used by the greatest number of permittees. In number of transactions, the grazing business is foremost, and of the total of 25,500 permits issued in the 18 states in which there is grazing in the national forests, 7,081, or nearly 27 per cent are in Utah. On one forest in this region, with headquarters at Ephraim, the number 1,800 is greater than in 11 of the 18 states. This does not mean that Utah carries one-fourth of all the stock grazed in the forests, for individual flocks are larger elsewhere. It means that more people use the forests commercially in Utah than in any other state.

The difficulties of maintaining a telephone line across a mountain summit at 11,000 feet altitude is well illustrated on the south slope of Horseshoe mountain. A telephone line with new spruce poles, built last fall, suffered not only broken wire and brackets, but brackets were torn from three poles consecutively, and a 10-inch pole was broken off 10 feet from the ground. The force of northwest winds on this summit is shown by the great drift of snow that yearly forms here. On June 15 it was still a mile long, from 200 to 300 feet wide and from 10 to 50 feet deep, packed so hard that although melting you could ride upon it horseback.

Dry weather in southern Utah is affecting the valley ranges, some young cattle are being shipped north, and a temporary depression in prices is reported. The sheep, especially the lambs, need more rain, and permission is asked to start the flocks into the forest ranges ten days earlier than usual.

Sale On Porch Furniture

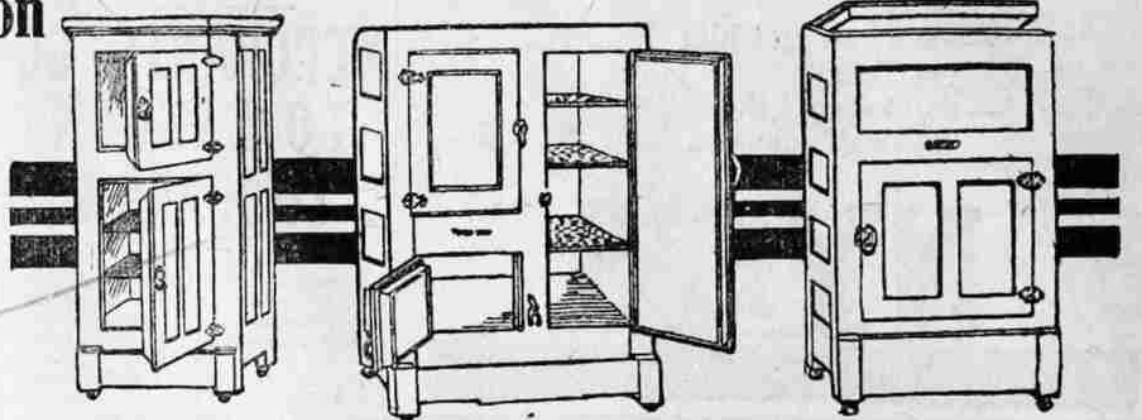

Your choice of any piece in the complete showing including this season's goods at a saving of 1-3 in price.

Old Hickory Porch Furniture included in sale. All Heywood and Wakefield latest summer goods go at 1/3 off. Over 75 styles of Rockers and Chairs to select from, ranging in price from \$2.00 to \$20.00.

All Hammocks, Couch Hammock and Porch Swings reduced to 25%. Now is the time to buy that hammock, just at the beginning of the season. The prices will not go lower and the selection is at its best.

Clearance Sale On All Refrigerators Including the Bohn-Ranney-Gibson

Take any Refrigerator you wish at a saving of 25%. Owing to unforeseen conditions we find we are considerably overstocked on refrigerators and rather than wait until the middle of summer before making reduced prices, we have decided to commence the sale immediately—Prices start at \$11.00 and up to \$150.00, from which prices there is a discount of 1/4.

Special Sale on

the best made—
4 ft. \$2.50; 6 ft. \$3.60;
8 ft. \$4.75; 10 ft. \$6.75

ARRANGING FOR NURSERY IN THE CITY

The Martha society met Saturday afternoon, at 2622 Madison avenue, the place selected for the day nursery and free kindergarten.

Sixteen members of the society were present, and the business of engaging a matron and assistant was discussed. This being a subject of grave importance, it was laid over to be decided upon at the next regular meeting, which will be held at the home of Mrs. Joe Scowcroft, Monday, June 23, when a full attendance is expected.

The furnishing committee was appointed as follows:

Mrs. Ezra Rich, chairman; Mrs. E. O. Watts, Mrs. W. S. Browning, Mrs. Abe Kuhn and Mrs. Patsy Healy.

Some furnishings already have been donated and have been gratefully received.

Those having anything to do for this purpose, can call up any member of the committee and the things will be called for. Dishes, household linen, stoves, especially a kitchen range, will be acceptable. These set things may not be necessarily new.

The society feels there is need of such a home in this city and is working earnestly for it.

Mothers who are employed through the day can find here a safe home and kind care while they are absent at work.

Residents of Ogden who have not given matters of this kind serious thought may not realize how much harm, both morally and physically, often comes to children of tender years, who are left for the day (which seems so long to them) with no proper care.

Other committees will be appointed at the meeting on Monday next.

FAREWELL
At the Fourth ward Friday night, June 21, for the benefit of Bro. Ray Summerell, who goes shortly on a mission in the east. Adv.

PRIZE FOR THE BEST MILK COW

J. C. Lambert, deputy state food and dairy inspector, who is in Ogden today making an examination of dairies and creameries, announces a statewide dairy cow competition in which all owners of dairy cows are urged to join. The state dairy and food bureau is back of the movement, but the project is being aided by the United States dairy division of the department of agriculture and the Agricultural college.

The proposition is to have each dairyman keep a record of his cows for a year, the owner of the cow having the best record in the state to be awarded a grand prize. The grand prize is the gift of a bank of Salt Lake. In addition, there will be prizes awarded in each county.

One of the local banks will donate the prize for Weber county. The committee has called upon the bankers and has found that there are several who are willing to offer a prize.

And upon which the prize will be awarded has not been set but it

STILL WORKING ON THE POWER PLANT

The Utah Light & Railway company still has a large force of men placing machinery for the power plant at the mouth of Ogden canyon.

Joseph Jordan has begun excavating for the eight-acre reservoir immediately south of the power plant, which will be used to hold surplus water to avoid flooding farms on the lower level when the plant is at full capacity.

Local Manager S. T. Whitaker says that when the improvements on the power plant have been completed it will be the best hydro-electric system in the state.

The company's new gas tank has been painted, but Mr. Whitaker states that it will not be filled with gas for at least two weeks. The engineers desire to give the tank a thorough test.

RANDOM REFERENCES

Guests at Theater.—The employees of the overall factory of the John Scowcroft & Sons' company will be the guests of the Footie Cloninger company at the Orpheum this evening.

"The Idler" is the production to be presented as an introduction to taking over the larger playhouse.

Wes Johnson Dead.—A. R. Cave has advised Joseph Scowcroft that Wes Johnson, well known in Ogden, died this morning at Elko, Nev. The funeral will be held Tuesday afternoon under the auspices of the Masonic lodge at Elko.

New Residence.—E. J. Isackson is building a residence on Twelfth street, between Washington and Adams avenues, that will cost in the neighborhood of \$2,200.

Fishermen.—William Doyle, William and Alex Taylor and C. A. Bass spent Sunday on trout streams in the vicinity of Paradise, Cache county, and they captured a number of the beauties.

Almost.—Judge A. G. Horn spent yesterday on Ogden river casting his line for trout. He makes affidavit to the effect that he came near catching the limit.

Delegates.—Vice president B. H. Bower of the Pacific States Nursery association stopped off in Ogden yesterday on his way from Provo to the association's convention, which will be held in Portland, Oregon, June 17 and 18. He was joined here by P. A. Dix and E. J. Harness of Roy, who are delegates. Mr. Bower has been in the nursery business in Utah county a number of years and he is familiar with orchard conditions here. He states that considerable damage was done some time ago by frost but that the fruit crop this year will be a good average and that the quality of the fruit will be better than in the past few years.

McGriff Suit.—In Judge Harris' division of the district court this afternoon is being tried the case of E. G. McGriff against the Ben Lombard Orchard company. The suit was instituted to recover \$540 alleged services for the company.

Marriage Licenses.—Marriage licenses have been issued to Charles Stein and Ella Cook of Green River, Wyo.; Benjamin Barnes and Sophia Scott of Kansas City; Austin E. Hattchett and Jennie Loretta Cunningham of San Francisco; Erwin Lewis Child of Hooper and Hazel Naomi Pincock, of Ogden, and to Nakor G. Hansen and Ellen J. Mortenson of Ogden.

Damage Case.—In the personal damage case of T. D. Ryan, administrator of the estate of Kantara Yoshitake, deceased, against the Union Pacific company, a jury is now being empaneled. The suit is for \$5000 alleged damages for the death of the deceased.

damages for the death of the deceased, which occurred at Devil's Slide, October 10, 1911, the complaint alleging that the death was caused by a train of the defendant company running over the deceased. The accident occurred while Yoshitake was endeavoring to cross the railroad track near where he was employed by the Union Pacific Cement company. Carelessness and negligence are alleged.

Stone Divorce.—In the case of Laura Stone against Howard Stone, a final decree of divorce has been issued.

Hoken Olsen.—The attorney in the case of the state against Hoken Olsen has given notice of intention to move for a new trial. The motion will be based on the grounds that the jury in the case was misdirected, that the facts were not sufficient to warrant the verdict and also that the court erred in permitting the state to offer proof of the complaint which, the attorney claims, did not contain facts sufficient to constitute a cause of action.

At the Berges.—William O'Leary was taken to the Berges hospital today for treatment.

The Misses Skilpan and Gaupacy, who have been engaged in mission work in India, spoke at the Central Park Presbyterian church last evening.

They spent yesterday in Ogden en route to New York.

Wholesale Produce Houses to Close.—The wholesale produce houses of the city will close at 12 o'clock tomorrow to enable the employers and employees to participate in the outing at Lagoon of the Retail Merchants.

Mr. and Mrs. C. H. Stevens and children, who accompanied the remains of Mrs. Stevens' father, C. W. Harrington, to Concord, N. H., for interment about the middle of May, have returned and are glad to enjoy the clear, invigorating Ogden atmosphere again. While away, they visited with relatives of Mrs. Stevens in several of the New England states, but found no place as inviting as their mountain home.

SURVEYING THE HOMESTEADS IN FOREST

Timothy C. Hoyt, of the land department of the forest service, and J. C. Brown have gone to Salt Lake today to confer with the surveyor general on the surveying homestead lands in the national forests. An effort will be made to get the surveyor to begin operations by July 1.

An announcement that will be gladly welcomed by hundreds of homesteaders within the national forests throughout the west has just come from Washington, to the effect that an arrangement has been perfected whereby metes and bounds homesteads in the national forests can be surveyed by officers of the forest service without expense to the entryman.

The law by authority of which the national forests were established, made no provision for homesteads in the national forests. When a great many forest had been proclaimed, however, it was found impossible to adjust their boundaries in a manner to entirely leave out the agricultural lands, as small tracts were scattered throughout many of the timbered areas.

The forester recognized the desirability of providing for the homesteading of these tracts, and drafted and suggested the passage of the forest homestead act of June 11, 1906, under which, in District 4 alone, more than 1400 homesteads have been taken in the national forests. It happened that a great many of the small tracts of agricultural lands in the forests were in unsurveyed country, and there was no provision for their survey except as the public land survey could be extended in the usual manner. Accordingly, the forest homestead act provided for

the opening of these lands to entry by special metes and bounds surveys made by the forest officers, who were, however, not recognized as land office as sufficient as a basis upon which to issue patent, and the entryman for each tract was required to furnish, at his expense, a second survey made by a surveyor designated by and under the instructions of the Surveyor General. The forest service, more than four years ago, suggested to the land office the desirability of some plan of cooperation to obviate the necessity of two surveys and to relieve the entryman of any expense in that connection. A suggestive plan was outlined and conferences and correspondence had between the two departments. It was found, however, that the plan was not feasible without some additional legislation, which has now been secured and the details of the cooperative arrangement worked out.

In anticipation of this plan, the forest service has been making special effort to have everything in readiness by the first of July, when the department of agriculture appropriation bill goes into effect making the funds available.

District Forester E. A. Sherman of the Ogden office announces that so far as the forest service end of the matter is concerned, everything is in readiness to begin the actual work in the field on July 1. The law requires that the forest officers who do this work must have the approval of the Surveyors General of the various states in which the work is to be done. District Forester Sherman states that the whole personnel of his district has been gone over carefully in the selection of the men to be recommended to the surveyors general for assignment to this work, and only those of known ability as surveyors will at first be recommended.

In District 4, embracing Utah, Nevada, most of Idaho, and portions of Wyoming and Arizona, the field work will be under the direction of B. L. Wheeler, of the Ogden office, assisted by J. C. Brown, C. P. Calvert, and W. B. Rice.

"That the announcement will be welcome to many homesteaders," said District Forester Sherman, "can be appreciated by all who know what it means to a struggling homesteader to know that he is relieved of the expense of a survey. Agricultural lands in the forests are usually in remote sections, and surveyors over in most instances had to be brought from a distance, and surveys in this district have been known to cost as high as three and four hundred dollars. Government and Carey Act reclamation projects and purchases of lands from the states have very largely drawn the intending settlers who have been favored with funds to any extent, while in a vast majority of cases the settlers in the national forests are the homesteaders who have been, by force of circumstances, compelled to seek the cheaper land, and I know that I speak for the Forest Service as a whole and every individual member thereof, when I say that I am heartily glad to know that the settlers in the national forests are relieved of this burden, and we expect in the future, as we have in the past, to do the very best we can to facilitate the work and plans of the bona fide homesteaders in the National Forests."

Today Judge N. J. Harris gave the following decisions in his division of the district court:

W. J. Snyder vs. Union Fuel company; motion for new trial denied.

Henry McCullough vs. O. S. L. R. R. Co.; motion for new trial denied.

Josephine Flint Escamilla vs. Joseph H. Hellewell et al.; motion for a new trial denied.

Oreane Hogge vs. Salt Lake & Ogden Railway Co.; demurrer of each defendant overruled; defendants granted ten days in which to answer.

DECISIONS
